Circular transition

Prague

A circular city

"one that promotes the transition from a linear to a circular economy in an integrated way across all its functions in collaboration with citizens, businesses and the research community. This means, in practice foster-ing economic activity by maintaining the value and utility of products, components, materials and nutrients for as long as possible in order to close material loops and minimise harmful resource use and waste gen-eration. Through this transition, cities seek to improve human well-be-ing, reduce emissions, protect and enhance biodiversity, and promote so-cial justice, in line with the Sustainable Development Goals" (ECCD, n.d., para: "Cities and the Circular Economy").

Multi - level governance

How to do it?

... and where are we?
